Biweekly paycheck allocation

Assign each bill to the paycheck that arrives before it is due.

Three steps

1. List both pay dates
2. Assign bills by due date
3. Subtract reserves before spending

A worked example

Pay date	Dec 1
Net pay	1200
Bills	780
Reserve	200
Left to spend	220

1200 minus 780 minus 200 leaves 220.

Use cleared income and check due dates.

Biweekly paycheck allocation

Use one row per item or decision. Start with what you know.

Pay date	Net pay	Bills	Reserve	Left to spend
