Declutter progress without counting items

Track completed areas and what made the change useful.

Three steps

1. Choose a functional outcome
2. Complete one action
3. Record the visible improvement

A worked example

Area	Entry
Before issue	Blocked shoes
Completed action	Cleared walkway
Next review	Sunday

A usable walkway is more meaningful than an item count.

Avoid discarding other people's property.

Declutter progress without counting items

Use one row per item or decision. Start with what you know.

Area	Before issue	Completed action	Next review

My next action / when
