Savings deadline planner

See whether a savings target is realistic by its deadline.

Three steps

1. Choose a target date
2. Subtract existing savings
3. Divide by time remaining

A worked example

Goal	Course
Target	900
Saved	300
Months left	6
Monthly amount	100

The remaining 600 requires 100 per month.

Adjust the target if essentials are squeezed.

Savings deadline planner

Use one row per item or decision. Start with what you know.

Goal	Target	Saved	Months left	Monthly amount
