Before winter home review

List visible maintenance concerns before colder weather.

Three steps

1. Walk through safe areas
2. Record visible issues
3. Arrange appropriate help

A worked example

Area	Window
Observed condition	Draft noticed
Priority	Review
Qualified help	Installer

A draft is an observation, not a diagnosis.

Avoid roofs and hazardous equipment.

Before winter home review

Use one row per item or decision. Start with what you know.

Area	Observed condition	Priority	Qualified help
