Exam topic confidence map

Choose what to revise based on actual recall rather than time spent.

Three steps

1. List exam topics
2. Try a short recall check
3. Prioritize gaps and revisit later

A worked example

Topic	Fractions
Recall check	Two errors
Confidence	Low
Next practice	Practice mixed problems

Specific recall errors identify what to practice next.

Use actual course requirements.

Exam topic confidence map

Use one row per item or decision. Start with what you know.

Topic	Recall check	Confidence	Next practice
