Seed packet sowing window planner

Organize sowing dates using actual packet and local conditions.

Three steps

1. Check packet instructions
2. Check local seasonal conditions
3. Record actual sowing date

A worked example

Plant	Basil
Packet guidance	After frost
Local conditions	Check local forecast
Planned date	Spring

A planned date depends on local conditions, not a universal calendar.

Species and climate requirements differ.

Seed packet sowing window planner

Use one row per item or decision. Start with what you know.

Plant	Packet guidance	Local conditions	Planned date
